OBJECTIVE

Passionate software engineer with a strong analytical and problem-solving skillset. Looking to be a part of a company where my skills and experience as a software engineer and data analyst will add positive value to the company's operations.

SKILLS —

Programming Languages
Python, JavaScript, HTML, CSS, SQL

Frameworks / Libraries
Django, Flask, Numpy, Pandas, Seaborn, React

Versioning Tools
Git, Github

Soft Skills
- Proficient in written and verbal English
- Ability to work under pressure
- Work without direct supervision
- Multitasking and prioritizing important tasks
- Adaptable and willing to learn new key technologies and techniques in the industry

EXPERIENCE

OCTOBER 2021 – PRESENT
Data Preparation and Extraction Freelancer • clickworker GmbH
- Cleaned and prepared datasets for different projects corresponding to its specifications and guidelines.
- Worked with different project datasets ranging from AI annotated images to search engine queries and ad results.
- Maintained a minimum of 92% accuracy on cleaned datasets submitted to clients.

JANUARY 2021 – JUNE 2021
Software Engineer • Adipster Tech Limited
- Worked alone and alongside teammates in implementing projects based on user stories and design specifications.
- Implemented back-end solutions to web applications using frameworks like Django and Flask.
- Created and performed unit tests on projects using Python's unittest module.
- Conducted security analysis on web applications by using tools like OWASP ZAP combined with manual code review and all found vulnerabilities were properly documented and sent to the production team for immediate remediation.

JULY 2019 – DECEMBER 2020
Data Analyst • Top Market Marketing
- Worked with sales, logistics, and finance teams in consolidating data from different departments and transformed them into reports and dashboards containing key insights using MS Office and Python.
- Performed data analysis using past and current data to determine sales trends among the different products offered by the company and provided actionable suggestions based on these findings that helped the sales team to achieve their target sales.

EDUCATION —

BS Civil Engineering
University of Baguio
2014 – 2019
